2017 HARVEST OVERVIEW

After a few dry winters, the 2016-2017 winter provided ample rain and snowpack statewide. The winter gave way to a relatively cool and wet spring compared to the last few years. As a result, bud break in Oregon started closer to normal in mid-April. The spring warmed up with record heat in late May that initiated flowering in most areas of the state. July ramped up the heat moving the vintage rapidly to véraison. However, August saw multiple one day records for maximum daytime temperatures with heat stress events early and late in the month.
